ABOUT THE COMPANY

DOCTILITAS TECHNOLOGY
CONSULTANCY LLC., 2025
DUBAI

Doctilitas (For Teachers initiative) is an educational technology consultancy based in Dubai. Our mission is to support schools, educators, and learning organizations in embracing the principles of Education 4.0 – aligning learning with real-world relevance, critical thinking, digital fluency, and global citizenship.

We believe that education must evolve with the world. In the era of AI and automation, students already use tools like ChatGPT and digital platforms to learn, explore, and collaborate. Our role is to help institutions harness these tools strategically and ethically. With Dubai investing significantly in EdTech and AI integration, we stand ready to support the transition to modern, effective, and scalable learning environments.

The big truth is, AI won't take our jobs as teachers, **only teachers who actively use and promote new technologies in teaching can keep up with the pace with our students and the job market.**

OUR CONSULTING APPROACH

Our consultancy services are structured to ensure deep understanding, strategic improvements, and measurable results:

THE PROPOSED SOLUTION

1 Analysis

- We observe and assess existing teaching practices, lesson structures, and learning environments.

2 Reporting

- We provide a detailed report with strengths, weaknesses, and practical suggestions for innovation.

3 Consulting & Strategy

- We co-create an integration and development plan focused on technology, pedagogy, and implementation.

4 Follow-Up

- We monitor results, gather feedback, and support continuous improvement.

CORE SERVICES

◆ Curriculum Design & Review

- Alignment with future-focused learning outcomes
- Interdisciplinary and real-world curriculum enhancements
- Lesson structure mapping and innovation

◆ EdTech & AI Integration

- Introduction and ethical use of AI tools
- Strategy for teaching and administrative applications
- Digital and AI literacy for teachers

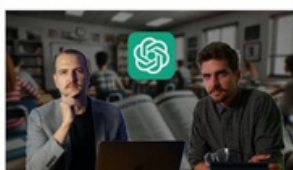

◆ Educator Training

- Virtual or onsite workshops
- AI and EdTech integration training
- Team-wide skill development

ONLINE LEARNING?

We offer flexible online courses for educators and education leaders looking to upskill at their own pace. Topics include AI in education, tech tools for teachers, digital course creation, and more.
